 github.com/rasoini  Turin, Italy

OVERVIEW

Software engineer with 5+ year of experience in building SaaS services. I consider myself to be very easy to work with in a team environment.

EDUCATION

Università di Pisa

2016 – 2020

Department of Computer Science

BSc. in Computer Science

Graduated with grade 106/110

Liceo Filippo Buonarroti

Grad. July 2016

Scientific High School Diploma

EXPERIENCE

Jet HR

Mar 2024 – ongoing

Software Engineer

Turin, IT

- Developing an HR suite used by 2000+ companies.
- Working on both backend and frontend.
- One of the first 10 engineers to join.

Technologies used

- Python
- TypeScript

Vedrai SPA

Feb 2023 – Feb 2024

Data Engineer

Pisa, IT

- Built a resilient and stable ETL pipeline for customers' data in order to provide useful data for downstream clients.
- Built and maintained a Django-based backend infrastructure to manage our data sources and serve data.

Technologies used

- Django
- Airflow
- Databricks

Vedrai SPA

Mar 2021 – Feb 2023

Backend Developer

Pisa, IT

- Handled all the data needs related to non-customer data, from ingestion orchestration to data storage.
- Built an in-house framework to ingest and store non-customer data on DynamoDB.
- Built a Python library to read data from DynamoDB in a reasonably fast manner.

Technologies used

- Python
- Django
- Airflow
- AWS
